

JONATHAN CLARK

SENIOR SOFTWARE ENGINEER

SKILLS

Languages:

JavaScript
TypeScript
Go
Python
Ruby

Back End:

Node
Nest JS
Express JS
Fastify
GraphQL

Front End:

React JS
Next JS
Remix JS
Redwood JS

MongoDB
PostgreSQL
AWS

Additional Skills:

Alpine JS
Shopify (Liquid)
jQuery
Bootstrap
HTML
CSS
SCSS
TailwindCSS
Mantine
Chakra

RESTful APIs
Unit testing
Figma
Adobe Tools
Affinity Tools
E-commerce
Leading
Team Efficiency

Tools: Mocha, Chai, Cypress, Webpack, Vite, Git, Jest, Jira, Vim

STRENGTHS

Continuous Learning
Adaptability and Resilience
Technical Proficiency
Problem-Solving Abilities
Collaboration and Communication
Attention to Detail
Creativity and Innovation

INTRODUCTION

Accomplished Senior Software Engineer with a passion for crafting efficient, high-performance code and a strong desire to tackle challenging projects. A proven track record of delivering innovative solutions and optimizing system performance across diverse software applications. Skilled in leading and mentoring engineering teams to excel in their professional growth while fostering a collaborative and knowledge-sharing environment. Seeking an opportunity to leverage expertise in software development in order to drive impactful results for a visionary organization.

WORK EXPERIENCE

SOFTWARE ENGINEER III

Pvolve // April 2022 - Current

- Golang, Shopify, Liquid, NextJS, Jest, Cypress, Typescript, AWS, AlpineJS, Tailwind...

- o Successfully leading a team of skilled engineers in the development of Shopify themes and apps, leveraging cutting-edge Shopify performance techniques and features.
- o Comprehensive oversight and delivering effective solutions across various teams and codebases within the organization. This includes providing support to backend, streaming, and mobile operations, ensuring smooth and efficient functioning.
- o Architecting interesting solutions to support streaming subscription system as well as making sure teams follow security best practices.

SENIOR CONSULTANT

CapGemini // October 2021 - April 2022

- Javascript, HTML, CSS, SCSS, SQL, Shopify, Liquid, ReactJS, Jest

- o Led a team of international and local developers in the submission and maintenance of Shopify apps utilizing the Shopify Payments API along with providing widgets to client Shopify themes.
- o Verified code quality within the team and helping with various coding tasks including writing tests using Jest.
- o Provided project architecture knowledge and communication between dev team, management, and other dev teams.

FULL STACK DEVELOPER

Independent Contractor // September 2020 - October 2021

- Javascript, HTML, CSS, SCSS, SQL, Shopify, Liquid, Wordpress, ReactJS, NextJS

- o Generating repeat clients by providing exceptional code and consulting primarily for e-commerce companies on Shopify.
- o Building tools and solutions for these companies at their request, meeting with owners to brainstorm ways to streamline processes within their business.
- o Learning new technologies by rebuilding tools, building custom themes and small apps. Using React, Webpack, and serverless technologies to extend Shopify frontend.

FULL STACK DEVELOPER

Thinkful // April 2020 - September 2020

- NodeJS, ExpressJS, PostgreSQL, MongoDB, ReactJS, Javascript ES6, HTML, CSS, SASS

- o Provided leadership and organization to multiple teams working on small-medium web app projects.
- o Improved upon and mastered many industry best-practices including semantic HTML, reactful design, and agile methodologies.
- o Deployed multiple small to medium sized web apps using both modern and tested technologies like ReactJS, SQL and no-SQL databases, and NodeJS.

IT CONTRACTOR

Dirt Masters LLC // January 2018 - February 2020

- Javascript, HTML, CSS, SQL, Shopify, Wordpress/Woocommerce, Bigcommerce

- o Developed and deployed an automated system to sync products to the e-commerce system in use.
- o Provide consultation and installation of e-commerce and storefront services.
- o Supported new technology deployment and provided maintenance on current systems including e-commerce, security, and Amazon systems.
